SUMMARY

For the past eight years, I have been working remotely with American companies, honing my skills and contributing to various projects. My extensive experience in front-end development has equipped me with the ability to develop engaging and user-friendly interfaces that drive user engagement and business growth. I take pride in staying up-to-date with the latest design trends and technologies, ensuring that my work is always at the cutting edge of the industry.

I started as a designer but now I'm focused on front-end. Holding a degree in game design and front-end development from Anhembi Morumbi University in São Paulo. With over a decade of experience in design and development.
